ONGUARD
SAFETY

OnGuard Safety is Digital PPE for all workers performing their daily tasks. Helping companies to prevent negligence, reduce insurance premiums while causing minimum impact on existing workflows.

Compatible across all platforms

FIRSTNET
APP CATALOG™

Accident Prevention

OnGuard Safety is the only application that actively prevents incidents from happening.
Hazardous Location Alerts
Upon entering a hazardous location the worker is:
- Alerted about the situation
- Reminded to wear appropriate PPE
- Enrolled into a Life Check Mode
- Placed on a watch list

Danger Zones
Danger Zones can be set to prevent workers lacking the right training or credentials from entering certain areas or tell other workers to exit a specific zone where a danger is present.

Mobile Hazard Alerts
Workers on foot and drivers of potentially dangerous vehicles (e.g. big machinery or fork lifts) receive alerts of a potential collision.

FIRSTNET
APP CATALOG™

Alerts

OnGuard Safety provides redundancies to assure that workers in emergency situations are being noticed.

Emergency Alert
Pressing a simple button on the screen, a physical red button on a phone or a panic button on a wearable.

Life Check Mode
Workers can check in on a regular schedule. Should they miss a check in, their status goes into Emergency.

Fall and Idle Detection
Automatic alerts can be send when the app detects a fall or a specific period of stillness.

Wearable and IoT support
Gas detector integration triggers specific alerts in the **Command Portal** and to nearby workers. IoT devices like personal Bluetooth panic buttons are also supported.
Incident Resolution

OnGuard Safety provides capabilities to quickly assess a situation and respond appropriately and effectively.

Exact Locations
Best in class positioning technology for indoor and outdoor positioning. On-demand locations provides instant location updates when needed.

Emergency Management Dashboard
Knowing the precise state and reason of an Emergency alert and having defined call down lists, call management profiles and escalation notes help to stay on top of any situation.
Emergency Monitoring
OnGuard has you covered 24/7/365 with emergency dispatchers that are ready to make sure you have the best possible outcome for your emergency.
Compliance Reporting

OnGuard Safety has full reporting capabilities and functions to prevent workers from tampering with their Digital PPE.

Status Reporting
Report on location history, status changes and check-ins for post-incident training or proof of compliance.

Full Remote Control
Administrators can configure individual settings and locked them so that users can no longer make unauthorized changes to their safety settings.
