Designed for First Responders

With **TULU Pro**, it's fast and easy to communicate, account, and locate people in an emergency.

(1) Create alerts, (2) Send updates, (3) Account for everyone's status, and (4) Locate and communicate with users to provide help.

All with one simply powerful app that's always at your fingertips.

As a FirstNet Listed app, you can be confident **TULU Pro** is relevant to first responders, highly-secure and highly available.

Features

Emergency Alerts – Administrator sends emergency alerts from their mobile phone or desktop via push notifications, text and email to users. Alerts are time and date stamped. Users' devices continue to display the alert until the emergency is dismissed.

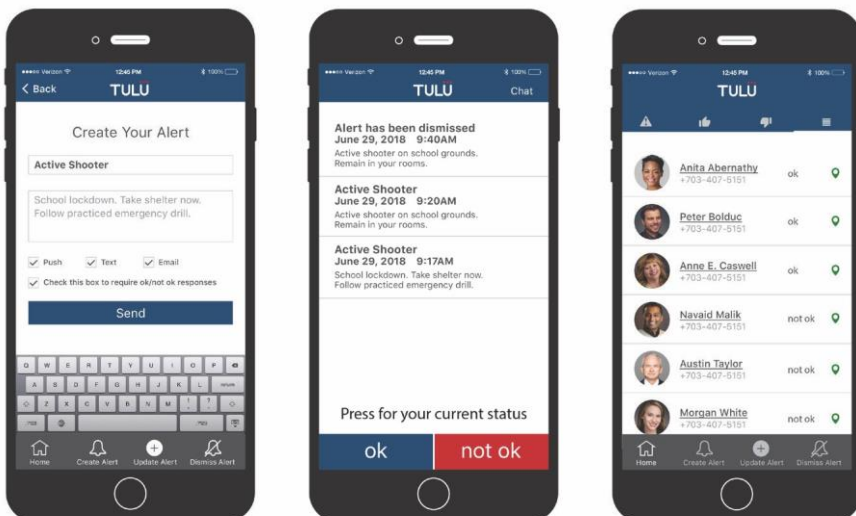

Updates – Update users as the situation changes.

OK / Not OK – 1-tap response let users report their status to the Administrator.

Geo-locator – GPS pinpoints the location of each user so first responders can send help where it's needed.

Status Dashboard – Simple dashboard displays situation overview. Administrators have a real-time view of all user status.

Chat – Allows a user to communicate with an Administrator during an emergency.

Core Components of Mass Emergency Notification System
