

5 Reasons for FirstNet

It's indispensable for patient care communications

Healthcare professionals like you have no time to waste. FirstNet helps you respond faster with fewer frustrations – to improve medical outcomes in your community.

#1

Reliable connectivity across remote areas

Make real-time connections on the scene and in the moment to improve patient outcomes, especially in remote areas.

Over **2.81 Million** Square Miles of LTE Coverage, Nationwide

#2

Network priority for patient data

Share critical patient data when it matters most. FirstNet has priority and preemption for voice and data across the only network built with, and for, first responders.

#3

Emergency response coordination

Improve situational awareness for coordinating effective emergency responses with first responders on the same trusted network.

Over **21,800 Public Safety Agency/Organization** Subscribers

#4

Patient data protection

Gain peace of mind with the only network offering comprehensive encryption and robust end-to-end protection for sensitive data.

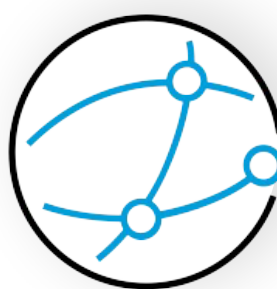

24x7x365
Monitoring by
Trusted Security
Experts

#5

Emergency backup readiness

Wireless backup on FirstNet means nurses and doctors always have access to key communications, applications, and systems.

Over **3.7 Million** FirstNet Connections

“Firstnet for healthcare – it’s so much more than a network.”

Join the network made for medical emergencies. FirstNet is the way to stay connected for time-critical patient care. Help improve outcomes with the most widely used, empowering network built for first responders and medical professionals.
