Android	Samsung	SM-G975U	GS10+

* **Optimized for FirstNet Push-to-Talk** - Device has the FirstNet PTT client embedded in the operating system, which may result in prioritized PTT traffic and better calling performance. Level of optimization varies by handset vendor and model. Device may also have physical features that enhance use for PTT (e.g. dedicated hard keys or ruggedized form factors).

** **FirstNet Push-to-Talk capable** - Device supports downloading and use of the FirstNet PTT client application.

For more information on the devices that support FirstNet Push-to-Talk, visit firstnet.com/devices. Use of FirstNet Push-to-Talk on other devices is not supported.
