Person-to-Person Texting

RumbleUp is an easy yet powerful P2P texting platform trusted by hundreds of organizations to quickly engage any size audience via SMS or MMS

P2P texting equips your organization to have one-on-one conversations with hundreds, thousands or millions of people simultaneously and seamlessly.

Why Use P2P Texting?

1

Over 90% of text messages are read within the first 5 minutes.

2

Texting is the channel people care about most.

3

Texting with RumbleUp is 50X faster than live calling!

People tend to ignore robocalls, many people never check their voicemail, and 1-way texts do not help people who have simple (and urgent) questions. That's why human-powered texting is the best solution.

rumbleup

We have the experience to ensure you are successful with P2P texting even if you have never done it before. Our support team has helped clients serve people in disaster and crisis situations. We are here to help you help others via text.
