<sup>1</sup> Data throughput capped at maximum speed selected by Customer, which may not provide the highest speed available at your location. A plan’s “up to” data speed is not guaranteed to be your actual speed. Actual speeds vary and may be affected by several factors, including your proximity to a cell site, the capacity of the cell site, the number of other users connected to the same cell site, the surrounding terrain, AT&T network management practices, the applications you use, and your in-building coverage.

<sup>2</sup> Plans are not intended as a substitute for consumer Internet services. Plans do not allow access to entertainment and other non-business websites that offer video or audio streaming services and may not be used for entertainment, audio streaming, web hosting, or public or guest Wi-Fi.
