# Intrepid Reports

**Intrepid Response for FirstNet® has a new module that simplifies and streamlines the full incident management lifecycle, from planning to execution, to FEMA reimbursement.**

NUMBER 04 – 2023

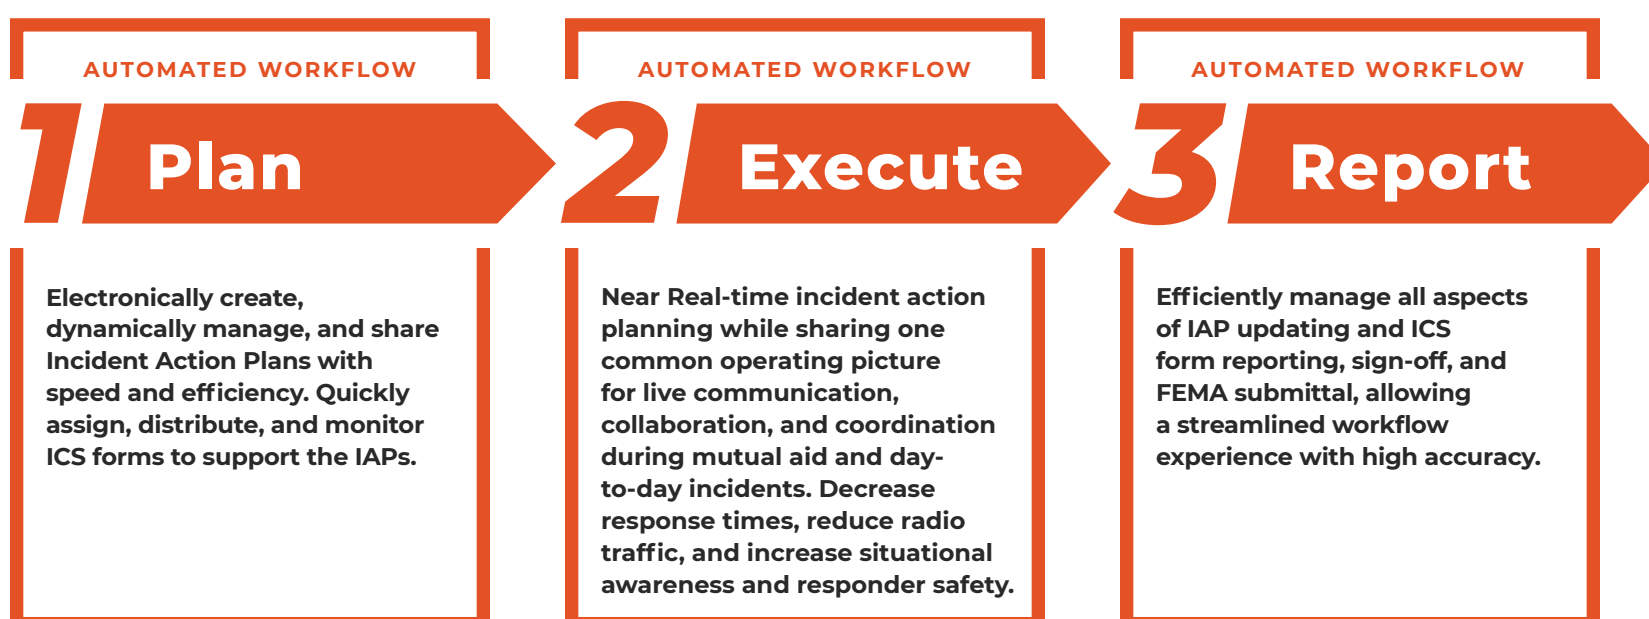

# Intrepid Reports and the Response for FirstNet Platform

## A total life cycle incident and event management platform from planning to FEMA reimbursement submittal.

Introducing Intrepid Reports, an innovative addition to the Intrepid Response for FirstNet situational awareness platform. Intrepid Reports automates workflows that follow the Incident Command System (ICS) structure for planning, documenting, and reporting on mutual aid incidents or planned events.

Combining Reports with Intrepid Response for FirstNet enables teams to plan, execute, and report in one easy-to-use platform for total life cycle incident management.

**“We use Intrepid Response  
in every tactical operation.  
I can’t imagine going back  
to the days of managing  
tactical operations without  
all those useful features that  
Intrepid Response puts  
at my fingertips.”**

# Plan

## Pre-Planning and IAP Creation

Intrepid Reports is a web-based system that enables teams to create, manage, and share Incident Action Plans (IAPs), keeping personnel informed of the operational period's incident objectives, work assignments, available resources, and planned actions to achieve the goals. Use automated workflows to quickly and efficiently create, distribute, update, and monitor ICS forms to support the mission.

- One click ICS form data entry for information such as personnel, vehicles, hospitals, ambulance services, or radio comm tables.
- Configure a vast number of operational periods.
- ICS form data is automatically replicated and carried over to operational periods, saving valuable input and set-up time.
- Supervisors can quickly adjust, manage, and share strategies and tactics as the situation evolves.

**COMING SOON:**  
Reports Mobile,  
fill out and edit ICS  
forms on-the-go.

## Advantages

Quickly create, manage, share, and adapt ICS forms and Incident Action Plans as the incident unfolds.

Reduce operating hour costs with ICS form automated workflows.

Near real-time monitoring of ICS forms status and changes.

**“IAP development is a cyclical process, with personnel commonly repeating planning steps for every operational period and often across disparate incidents.**

**With Intrepid Reports, information is efficiently entered once, automatically carried over operational periods, and archived for retrieval during subsequent incidents or events.”**

JOHN FAZIO

SOUTH FLORIDA POLICE OFFICER

## **\_DID YOU KNOW**

ALL ICS FORMS CREATED WITHIN  
INTREPID REPORTS FOLLOW FEMA'S  
STANDARD FORM STRUCTURE.

# Communicate, Collaborate, and Coordinate During the Event

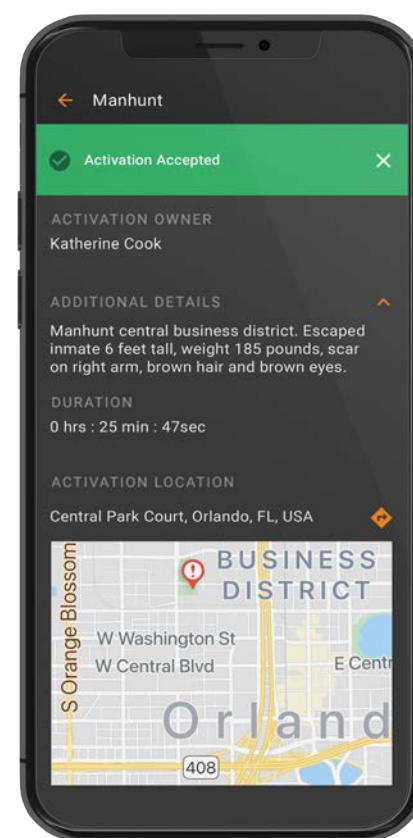

## Intrepid Response for FirstNet Situational Awareness Platform

### Execute Activate and Mobilize Your Team

Intrepid Activate is a simple-to-use web and mobile emergency notification and response team mobilization tool. Quickly call out the entire team in just a few clicks, significantly reducing response times.

Activate provides three means of emergency notification to the user: a loud audible alarm that can override phone sleep settings, SMS messages, and emails that persist every 60 seconds until the user accepts or declines the activation request.

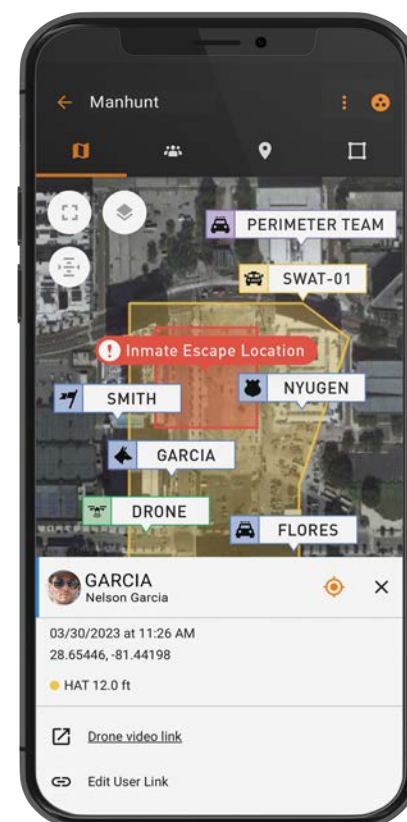

Intrepid Reports creates an incident directly from the activation and auto-populates the data into the IAP, saving input and set-up time.

### Live Location and Team Coordination

Intrepid Locate is a web and mobile geospatial solution with feature-rich mapping that provides near real-time personnel X, Y, and Z positions, with the ability to add static locations of interest, geographic boundaries, routes, KML files, and other geospatial data. Intrepid Locate empowers field users and incident managers in the command centers to make better-informed decisions. Attach IAPs, PDF files, photos, and URL links to static map markers for the responders to access.

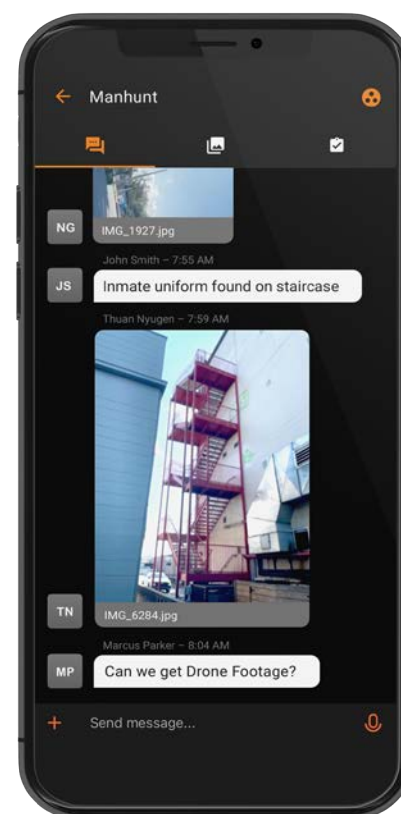

The Intrepid Channels feature enables organizations to manage multiple operations, departments, sectors, or investigations simultaneously and ensure the data is viewed and updated by authorized users. Additionally, our Mutual Aid shared channel feature allows multiple organizations to share locations and collaborate in one operational channel for increased situational awareness during incidents.

# Execute Team Communication and Collaboration

Intrepid Connect is a multi-layered collaborative workspace that provides highly secure team communications and sharing of digital content on demand. Instantly share text messages, notes, videos, annotated photos, interactive whiteboards, PDFs, Word docs, and web links with the team simultaneously. Keep on track with built-in task management with automatic supervisor notification when the task is complete.

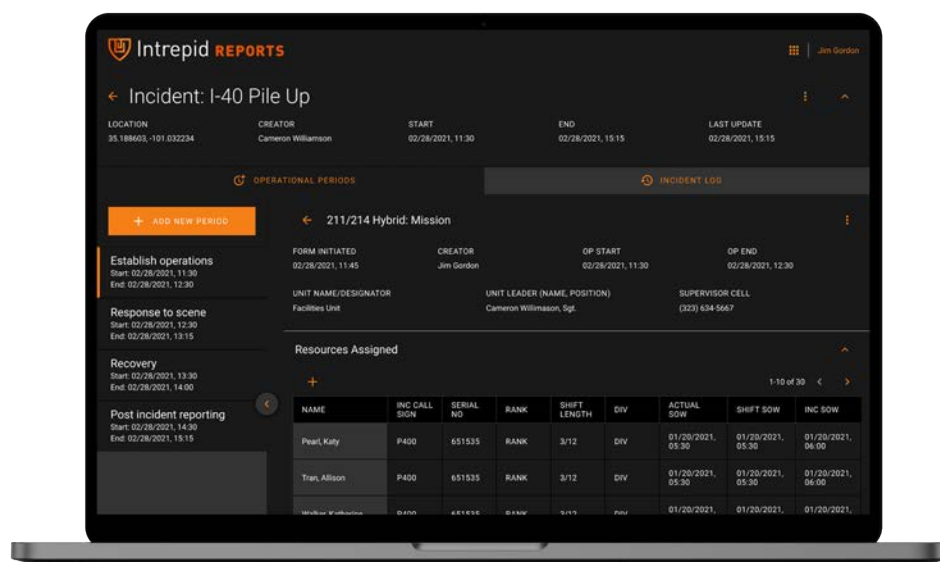

Connect enables responders to view, ingest, and retain the correct information at the right time, decreasing radio “tune out,” reducing radio traffic, and increasing responder safety. Additionally, our Mutual Aid channels allow disparate teams to share information and media during mutual aid incidents.

# Team Reporting and ICS Form Status

Intrepid Reports enables commanders to modify and adjust IAPs as the situation evolves and instantly disseminate to the teams. Quickly create, distribute, and monitor all ICS forms to ensure the teams are on task.

**Time saver: Create additional ICS forms, and the shared data is automatically transferred to the new ICS form.**

## Advantages

**Activate your team in a few clicks, significantly reducing callout and response times.**

**Enhance team communication collaboration, and coordination during the incident.**

**Monitor, adjust, and share IAPs and ICS forms more efficiently during the event.**

# Report

## Manage, Edit, Sign Off, Download, Submit

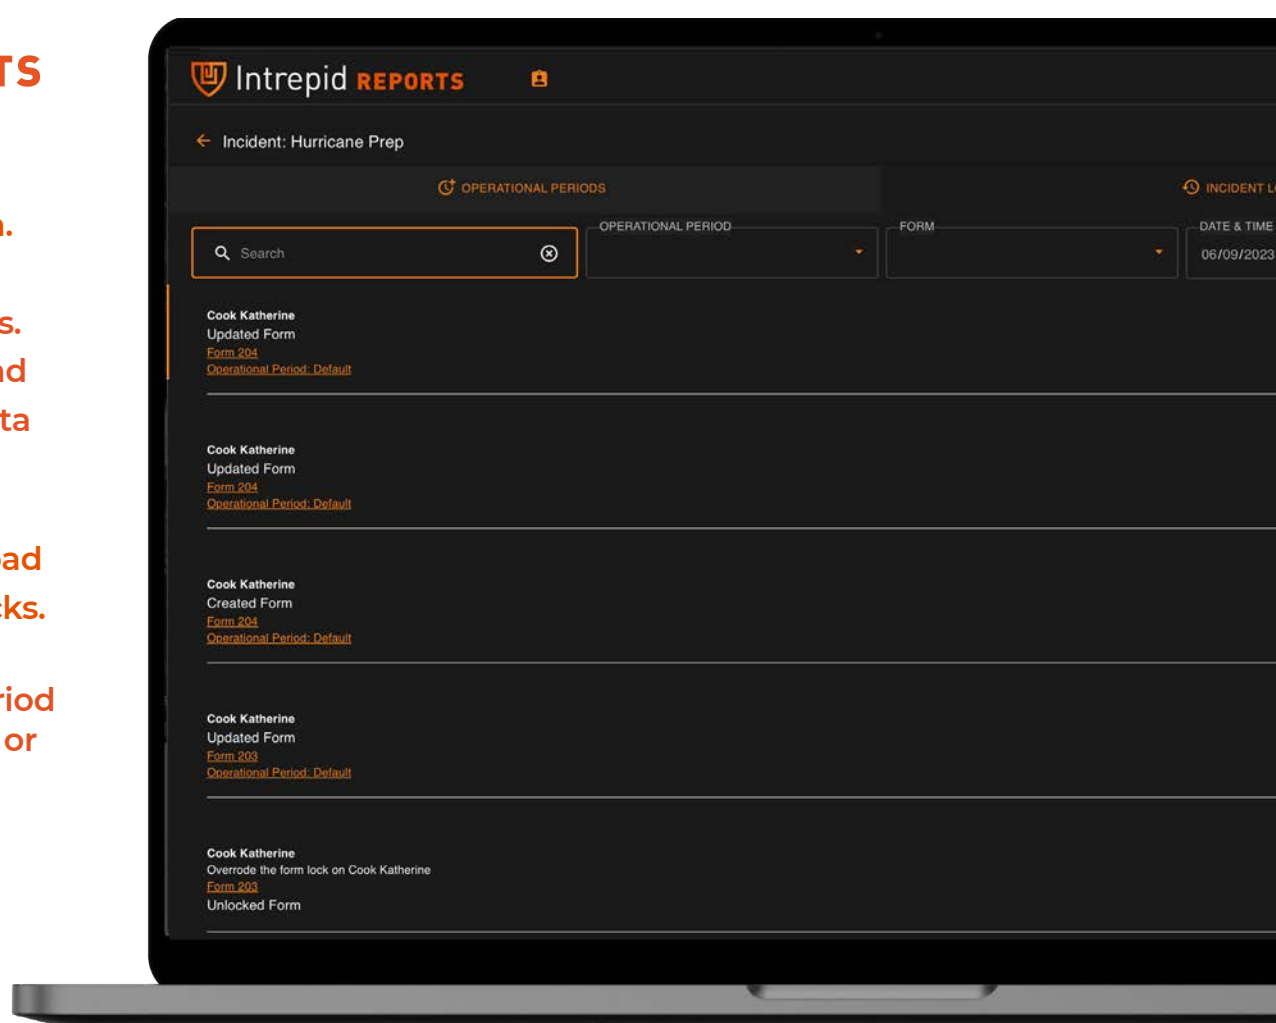

Intrepid Reports enables your agency to easily create and manage your ICS forms and Incident Action Plans for any event. With Intrepid Reports, users can edit, manage, sign off, and export ICS forms from laptops or tablets, enabling a fully automated reporting experience with high accuracy.

Fill out forms in a fraction of the time required for manual form completion, significantly reducing personnel hours (often overtime). Stop chasing down individuals to sign, submit, or finish their forms. Eliminate the time spent locating radio channels, hospitals, ambulances, and personnel resources with pre-populated drop-down lists that provide one-click information entry.

Additionally, supervisors have complete visibility of the current state of all forms and can quickly share changes or updates to the IAPs with the teams.

- Reduce errors and filing delays through automation.
- Monitor all ICS forms' status. Restore deleted records, and form-locking eliminates data loss.
- Quickly collate and download all ICS forms with a few clicks.
- Archive the operational period ICS forms for future events or easy retrieval.

## Advantages

Greatly reduce personnel hours spent on filling out and processing forms.

Reduce errors and filing delays through automated workflows.

Collate and download ICS forms for faster and easier FEMA reimbursement submission.

# Platform Advantages

## Planning

Quickly create, manage, share, and adapt Incident Action Plans and ICS forms as the incident unfolds.

Swiftly check in and assign resources for planned and unplanned events.

Reduce operating hour costs with ICS form automation.

## Execution

Decrease response times, reduce radio traffic, enhance team situational awareness, and increase responder safety.

Enhance team communication, collaboration, and coordination during the incident.

Enable interoperability through Mutual Aid channels that bring disparate teams together in one operational channel.

## Reporting

Use automation to aid ICS form editing, managing, exporting, and sign-off for rapid reimbursement submission.

Increase form completion speed and accuracy through auto-filling fields for one-click data entry.

Download collated PDF file of all ICS forms entered during an incident with one click.
