- FirstNet Ready: phones, tablets, laptops, smartwatches & consumer hotspot devices that are certified to support High Priority Access (HPA), all AT&T commercial LTE Bands & Band14 out-of-the-box.
- FirstNet Trusted: cellular hardware, such as sensors, routers, modems, cameras, and other connected devices that are certified to support HPA, all AT&T commercial LTE Bands & Band14 out-of-the-box and have been tested for security readiness.
- FirstNet Capable: devices certified to support HPA, all AT&T commercial LTE Bands and may require device unlock.

- FirstNet Ready: phones, tablets, laptops, smartwatches & consumer hotspot devices that are certified to support High Priority Access (HPA), all AT&T commercial LTE Bands & Band14 out-of-the-box.
- FirstNet Trusted: cellular hardware, such as sensors, routers, modems, cameras, and other connected devices that are certified to support HPA, all AT&T commercial LTE Bands & Band14 out-of-the-box and have been tested for security readiness.
- FirstNet Capable: devices certified to support HPA, all AT&T commercial LTE Bands and may require device unlock.

- FirstNet Ready: phones, tablets, laptops, smartwatches & consumer hotspot devices that are certified to support High Priority Access (HPA), all AT&T commercial LTE Bands & Band14 out-of-the-box.
- FirstNet Trusted: cellular hardware, such as sensors, routers, modems, cameras, and other connected devices that are certified to support HPA, all AT&T commercial LTE Bands & Band14 out-of-the-box and have been tested for security readiness.
- FirstNet Capable: devices certified to support HPA, all AT&T commercial LTE Bands and may require device unlock.

- FirstNet Ready: phones, tablets, laptops, smartwatches & consumer hotspot devices that are certified to support High Priority Access (HPA), all AT&T commercial LTE Bands & Band14 out-of-the-box.
- FirstNet Trusted: cellular hardware, such as sensors, routers, modems, cameras, and other connected devices that are certified to support HPA, all AT&T commercial LTE Bands & Band14 out-of-the-box and have been tested for security readiness.
- FirstNet Capable: devices certified to support HPA, all AT&T commercial LTE Bands and may require device unlock.

- FirstNet Ready: phones, tablets, laptops, smartwatches & consumer hotspot devices that are certified to support High Priority Access (HPA), all AT&T commercial LTE Bands & Band14 out-of-the-box.
- FirstNet Trusted: cellular hardware, such as sensors, routers, modems, cameras, and other connected devices that are certified to support HPA, all AT&T commercial LTE Bands & Band14 out-of-the-box and have been tested for security readiness.
- FirstNet Capable: devices certified to support HPA, all AT&T commercial LTE Bands and may require device unlock.

Sierra Wireless - Semtech	XR80 5G	XR80 5G	Router	FirstNet Capable	5G NSA

- FirstNet Ready: phones, tablets, laptops, smartwatches & consumer hotspot devices that are certified to support High Priority Access (HPA), all AT&T commercial LTE Bands & Band14 out-of-the-box.
- FirstNet Trusted: cellular hardware, such as sensors, routers, modems, cameras, and other connected devices that are certified to support HPA, all AT&T commercial LTE Bands & Band14 out-of-the-box and have been tested for security readiness.
- FirstNet Capable: devices certified to support HPA, all AT&T commercial LTE Bands and may require device unlock.
