EXTENDED PRIMARY USERS
Exclusively for public safety entities and their Agency Paid users

FirstNet® Fixed Wireless

for the FirstNet Evolved Packet Core

What is "fixed wireless"? "Fixed wireless" refers to wireless services used at fixed public safety locations such as stations, command posts, or emergency operations centers, or temporary incident sites.

FirstNet Fixed Wireless plans include:

- Fixed Wireless Backup Pooled and a FirstNet Fixed Wireless Broadband Plan to fit your agency's budget and needs
- Access to FirstNet 5G/5G+ service and 5G+ service, where available[1]
- First Priority®, which includes data prioritization and priority access capabilities[2]

[1] FirstNet 5G/5G+ Service: Requires a compatible FirstNet Capable 5G/5G+ device, FirstNet Subscriber Identification Module (SIM card) and FirstNet 5G/5G+ plan. Coverage not available everywhere. 5G+ is offered in limited locations in specific cities. Wireless technology varies by device. See firstnet.com/coverage for coverage details.

[2] First Priority® enables (a) priority access to the AT&T domestic 4G LTE and 5G networks and the 4G LTE and 5G networks of AT&T's domestic rural providers connected to the FirstNet Evolved Packet Core; and (b) prioritized treatment of select data traffic transmitted over such network. Extended Primary Users cannot invoke preemption capability. Optional First Priority® requires a FirstNet Capable device provisioned with an Approved Business Application using a FirstNet SIM card. Limited to Approved Business Application data traffic originated on and traversing over the AT&T network and the 4G LTE and 5G networks of AT&T's domestic rural providers connected to the FirstNet Evolved Packet Core.

FirstNet Fixed Wireless Backup Pooled

Plan	Eligible Device(s)	Data[3]	Monthly Service Charge
FirstNet Wireless Backup Pooled 1GB	Router or Mobile Hotspot Device	1GB	$10
FirstNet Wireless Backup Pooled 5GB	Router or Mobile Hotspot Device	5GB	$20
FirstNet Wireless Backup Pooled 10GB	Router or Mobile Hotspot Device	10GB	$40
FirstNet Wireless Backup Pooled 20GB	Router or Mobile Hotspot Device	20GB	$75

Taxes and fees extra.

Within each billing account, all FirstNet Wireless Backup Pooled lines of service with the same data allowance will be combined to create a Data Pool. For example: If your billing account has 3 lines on FirstNet Wireless Backup Pooled 1GB plans, those lines will be combined to form a Data Pool of 3GB. If the same account also has 4 lines on FirstNet Wireless Backup Pooled 5GB plans, those lines will not be included in the Data Pool for the 1GB plans; rather the 5GB plans will be combined to form a separate Data Pool of 20GB. Max of 4 Data Pools (one for each plan option) per billing account.

FirstNet Fixed Wireless Broadband			
Plan[1]	**Eligible Device(s)**	**Data**[2]	**Monthly Service Charge**
FirstNet Fixed Wireless Broadband Laptop Data speeds up to a max of 5 Mbps	Laptop	175GB	$25
FirstNet Fixed Wireless Broadband Core Data speeds up to a max of 25 Mbps	Router or Mobile Hotspot Device	175GB	$65
FirstNet Fixed Wireless Broadband Pro Data speeds up to a max of 50 Mbps[3]	Router or Mobile Hotspot Device	175GB	$75
FirstNet Fixed Wireless Broadband Ultra Data speeds up to a max of 100 Mbps[3]	Router or Mobile Hotspot Device	175GB	$95

Taxes and fees extra.

[1] Data throughput speeds are capped at a maximum data speed under the applicable Plan, which may not provide the highest speed available at your location at a specific point in time. **Each plan's "up to" data speed is not guaranteed to be your actual speed;** actual speeds vary and may be affected by several factors, including your proximity to a cell site, the capacity of the cell site, the number of other users connected to the same cell site, the surrounding terrain, AT&T network management practices, the applications you use, and your in-building coverage.

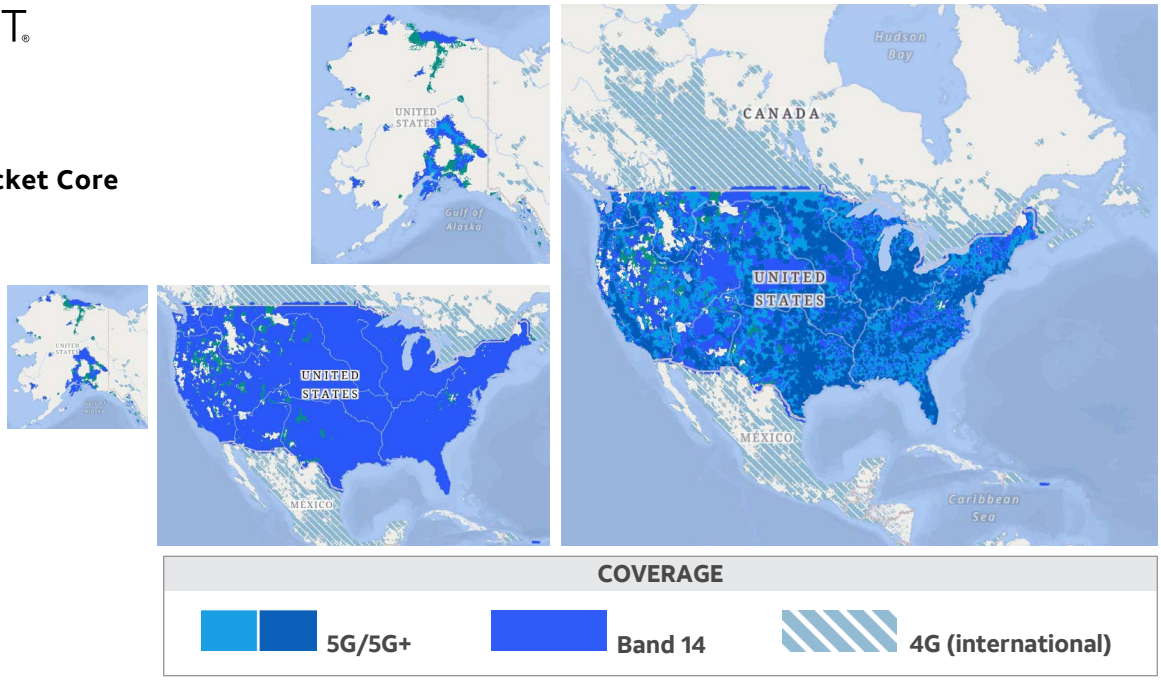

[2] There are no overage charges; **if data usage on a line exceeds 175GB for three consecutive monthly billing periods, AT&T may move the line to a FirstNet Mobile - Pooled plan for data-only devices (see firstnet.com/firstnetprimary)** and charge you the corresponding monthly amounts.

[3] Data throughput speeds of up to 50 Mbps and up to 100 Mbps require a wireless router with a Category 18 or higher modem and must be used where enhanced AT&T 4G LTE-Advanced service or FirstNet 5G/5G+ service is available.

IMPORTANT TERMS:
FIRSTNET Evolved Packet Core

Map depicts an approximation of outdoor coverage. Actual coverage may differ. Coverage subject to change at any time without notice. Coverage and service not available everywhere. For most current coverage info, check firstnet.com/coverage.

FIRSTNET FIXED WIRELESS PLANS: Exclusively available to Extended Primary User Public Safety Entities with a qualified AT&T wireless service agreement that includes, without limitation, (a) the Additional Service and Equipment-Related Terms found at att.com/abs-addtl-terms or comparable provisions and (b) the AT&T FirstNet Solution Service Guide (**Service Guide**) found at https://serviceguidenew.att.com/sg_flashPlayerPage/FIRSTNET (collectively, **Qualified Agreement**) for use by their Agency Paid Users. For definitions of Public Safety Entities, Primary Users and Agency Paid Users, see the Service Guide portion of the Qualified Agreement. **All AT&T services subject to the terms and conditions in your Qualified Agreement. DEVICES**: Each plan requires a compatible FirstNet Capable laptop, router or mobile hotspot device (sold separately) provisioned with a FirstNet SIM card. Eligible device varies by plan. See firstnet.com/devices for current list of FirstNet Capable devices. **PRICING**: Advertised monthly price includes monthly plan charge for wireless data service. **POOLED DATA:** Each Fixed Wireless Backup Pooled plan includes a monthly allotment of data ("Data Allowance") for use within the United States (DCA) and Puerto Rico (PR). Data Allowances must be used during the billing period provided and do not roll over. Tethering is permitted with compatible FirstNet Capable devices. If a line exceeds its monthly Data Allowance during a billing period, additional data will be provided automatically and Data Overage charges will apply at a rate of $5 per GB. Use of active-active network configurations consumes Data Allowance even when no outage or failover event occurs. Customers utilizing SD-WAN, network resiliency, or other active-active connectivity solutions are responsible for selecting a Data Allowance appropriate for their anticipated usage requirements. FirstNet Fixed Wireless Backup plans pool data at the Billing Account Number (BAN) level. Within each BAN, all lines activated on the same FirstNet Fixed Wireless Pooled plan with the same Data Allowance will be combined to create a Data Pool. No other FirstNet plan types, mobility plans, subscriber-paid plans, or AT&T pooled plans may participate in the Data Pool. During each billing period, each line first uses its individual Data Allowance. If a line uses less than its Data Allowance, the unused amount creates Under Usage. If a line exceeds its Data Allowance, the excess usage creates Over Usage and corresponding Data Overage charges. At the end of the billing period, AT&T will compare the total Under Usage and total Over Usage for all lines within the applicable Data Pool. If total Under Usage equals or exceeds total Over Usage, eligible Data Overage charges incurred by lines in the Data Pool will be offset in full, and any remaining Under Usage will be forfeited. If total Over Usage exceeds total Under Usage, available Under Usage will be allocated proportionately among lines incurring Data Overage charges, resulting in partial bill credits. Lines migrated into or out of a pooled plan during a billing cycle may be subject to prorations or other adjustments that may affect Data Pool calculations. Each BAN may contain multiple Data Pools corresponding to available FirstNet Fixed Wireless Pooled plan Data Allowance tiers; however, unused data may not be shared between different Data Pools or with any other FirstNet or AT&T pooled offering. Pooling of data allowances does not provide rollover data and does not eliminate Data Overage charges, which may still apply after all applicable Data Pool credits are calculated. **OTHER RESTRICTIONS AND FEES**: **Activation/ upgrade fee** per line (up to $50) and deposit may apply. If you purchased a device that requires a service term commitment, an **Early Termination/Cancellation Fee** may apply if you cancel Agency Paid User service after the first 30 days and before your service term ends. See att.com/equipmentETF for details on what fee applies for your device and how the fee is prorated over time. Credit approval may be required. AT&T reserves the right to suspend or terminate service to your account pursuant to your Qualified Agreement and/ or place any non-complying device on an appropriate plan. **ADDITIONAL AT&T FEES AND GOVT. TAXES:** Monthly AT&T fees apply per line and include Regulatory Cost Recovery Fee (up to $1.50). Administrative Fee (up to $2.49; up to $3.49 effec. August 5, 2026), Property Tax Allotment Fee ($0.20-$0.45; currently $0.26) and other AT&T fees that are not government-required. Additional one-time Fees may apply. Govt. taxes are extra. See att.com/mobilityfees for more details. **5G SERVICE**: Requires compatible FirstNet Capable 5G device, FirstNet SIM and FirstNet 5G plan. Coverage not available everywhere. See firstnet.com/coverage for details. **5G+ SERVICE**: Requires a compatible FirstNet Capable 5G+ device, FirstNet SIM and FirstNet 5G plan. Coverage available only in limited locations in specific cities. See firstnet.com/coverage for cities. Compatible device will display 5G+ coverage indicator when used in an area where 5G+ coverage is available. Other restrictions apply.

FIRST PRIORITY®: Feature provides prioritization of select data, priority access to available network resources, and preemption capability. **Requirements**: Agency Paid User lines must have a qualified FirstNet Wireless Broadband data plan, FirstNet SIM and 4G LTE-or 5G-compatible FirstNet Capable device provisioned with an Approved Business Application.. **Approved Business Applications**: Approved Business Applications are limited to applications directly related to the primary missions of Public Safety Entities. These include applications provided under the Qualified Agreement, including the App Catalog, and specifically exclude consumer-oriented applications such as, but not limited to video streaming. The plan selected must support the type of application which is subject to these terms. To help maximize the performance of the network for all public safety users, Approved Business Applications utilizing video should be streamed at a resolution of 480p. AT&T reserves the right to immediately suspend or terminate use of any such plan if found to be in violation. **Limitations**: First Priority Feature is available only in the Domestic Coverage Area (DCA) and Puerto Rico and only for Approved Business Application data traffic originated on and traversing over the AT&T domestic and the 4G LTE and 5G networks of AT&T's domestic rural providers connected to the FirstNet Evolved Packet Core. Feature may not be used for Internet traffic other than Approved Business Application data traffic. **Data Prioritization**: Feature does not prioritize Approved Business Application data traffic ahead of all other data traffic; other traffic may have the same or higher prioritization. **Priority Access**: Feature provides priority access to the available network resources of access to the AT&T domestic and the 4G LTE and 5G networks of AT&T's domestic rural providers connected to the FirstNet Evolved Packet Core. **First Priority® Uplift Management**: Provides Primary User Public Safety Entities' designated and authorized communications managers the ability to modify the relative priority and preemption capabilities of the Authorized Users of both Primary User and Extended Primary User Public Safety Entities provisioned with First Priority®. Uplifts may be performed for a minimum duration of 1 hour with a maximum of 48 hours for a given event through the use of the First Priority® Uplift Management portal.

Termination or Suspension: AT&T reserves the right to terminate, suspend or restrict the feature if use is inconsistent with applicable terms and conditions in the Qualified Agreement (including the Service Guide as applicable). **INTERNATIONAL ROAMING:** All FirstNet Fixed Wireless plans are provisioned with the International Roaming Blocking Feature. Customer must remove the feature to roam in international locations. There is no charge to remove this feature, but international roaming is subject to additional charges. International roaming will require purchase of an international plan (sold separately). International roaming locations are regularly expanded. See firstnet.com/firstnetinternational for details. **COVERAGE**: Coverage map shows high level approximation of areas included in and out of plan. **OFF-NET USAGE:** International and domestic off-net (roaming) data usage may be at 2G speeds. **Excessive Off-Net Usage:** You may get an off-net (roaming) usage allowance for each service. If you exceed any such allowance, your service may be restricted or terminated. See your Qualified Agreement for details. **QUALIFIED AGREEMENT DISCOUNTS:** Plans are not eligible for additional discounts, including but not limited to any CU service discount described in your Qualified Agreement.
